## UniBand Strapping

Universal clamping system for industrial applications.

Stainless steel for maximum tensile strength, superior durability and corrosion resistance.

Heavy duty, stainless steel band provided in reels.

Variable diameter covers a wide range of shapes and sizes to suite all types of applications.

Common applications include large diameter hose clamps, power poles and cables, clamping around pipes, tanks, concrete piping, cable bundles, etc.

Available with a plastic reel for easier handling.

Clamping tool enables correct tensioning of the band and provides an easy cut off facility.

### Plastic Tie Strapping

#### Plastic Tie Chain

Easily adjusted strap of infinitely variable lengths. A simple twist technique gives you many variations of strong strapping which can be undone and redone just as quickly.

The product is UV stabilised making it ideal for outdoor applications.

It remains incredibly strong and re-usable over a long period of time.

Other applications include horticultural, agricultural, electrical, construction and mining.

**12mm and 25mm widths**

**2.5mm thickness**

**Coil length 25m**
